ABOUT (US (ALL))

Here on earth, passing through, we, who have stolen fire from the heavens, have a duty to plant seeds of consciousness and light.

This fire show, created around the symbol of the tree, from seeds in the soil to branches and birds in the sky, invites us to celebrate the beauty of Life, to reconnect with our common source and unite with the other, the whole, the all.

We are human gardeners, sowing seeds of light, peace and joy, which enlighten our darkest nights, portending to the traveller a positive new day for our blue planet and our One humanity.

PERFORMERS

PHIL VON

Author / Composer / Singer
Performer flamenco dance and theatre

The music of Envol has its source and inspiration in the rhythmic and harmonic models of flamenco.

Phil Von draws on his experience as both flamenco dancer and electronic music composer to weave a rich, deep dialogue between these two worlds.

He transposes the sophistication of the "compas", with its ternary pulsations, its accents and syncopations, into a contemporary digital orchestration.

MUSIC, DANCE FLAMENCO

In live performance, these hybrid sounds create an aural latticework where poetry, song and the rhythmic verve of stamping feet, organically communicate the passion of this intermarriage.

This music, in its blend of caress and percussion, earth and air, darkness and light, is destined to nourish the energies and flames of Lara.

CREATION, DANCES WITH FIRE AND BIRD

After "Neige de Feu", "Alma", "Physalis" and "Ballade de Nuit", I felt the desire to propose a duo in a quieter and more intimate register.

I have provided a poetic landscape where symbolism and archetypes allow us to speak a universal language.

In this piece, I invoke the collective consciousness and invite each of us to face the reality of Life.

What will we leave behind us? What seeds are we sowing on this earth? Like a human gardener, I sow, plant, water and unroll my Ariadne's thread around the emblem of the Tree. The tree stands as an eternal bond between the heavens and earth, unfailingly welcoming the flight of birds.

The language of this duo has grown in the rich soil of our different artistic experiences (electro-flamenco,

performance, butoh, dervish, theatre, circus etc.), reaching across our cultural diversity to magnify the new unity of our mixing.

The fireplace of home invites us to reflect on the transformation of the world. Today, faced with the destructive conflagrations of spreading hatreds and the din of war, witnessing our earth in peril, the necessary choice is to resist and to fix our gaze on the good and the beautiful.

"Because where there is light
There is no darkness."
